MEDICAL BILL REVIEW

## MEMORABLE EXPERIENCE

I can't point to one specific experience that stands above all the others. What I can say is that my experience here has been vastly different from my previous corporate roles, and the defining difference is our culture.

What I appreciate most is that being a valued colleague isn't simply talked about; it's demonstrated through both affirmation and action. The collaborative spirit throughout the organization encourages each of us to bring our unique gifts and talents to the table and gives us the freedom to use them. Rather than trying to fit everyone into the same mold, our company recognizes and celebrates individual strengths.

## POWER OF CHOICE

I believe the power of choice starts with how we choose to show up each day. We can choose to approach challenges with a positive attitude, remain open to different perspectives, and look for solutions instead of obstacles. By choosing collaboration, empathy, and continuous improvement, we can make a meaningful impact on both our team and the people we serve. Every business, like life, faces challenges and unexpected turns, but I've seen firsthand how thoughtfully those situations are approached here.

*"We're not just cogs in a wheel or numbers on a spreadsheet, we're a team, and that's something I deeply value."*
